

Alor has its own microenvironment fed by currents from both the Indian and the Pacific oceans. Its waters are extremely rich, with a good variety of "big" and "small" life. The channels between its islands are established passages for cetaceous and blue and sperm whales are not uncommon sights. Below will be the draft itinerary when you are onboard of Damai:

Day 1: Arrive into Kupang

Guests will arrive in Kupang and have time to get comfortable on the boat. There is a large crossing towards the Alor region, and we will depart once we have settled on the boat.

No. of 0  
Dives:

Day 2: Karang Beatrice

First day of exploration around this extended submerged reef that comes 5 meters deep on it shallowest point.  
We were there back in 2010 and were surprised by the number of sea snakes around the reef, and the place is calling for further exploration.

Dives:

Day 3 and 4: Rote

2022 was the first time we conducted a few dives along the south of Rote, and we spotted a manta and a whale shark. Not bad for a first time.  
We will invest more time and, apart from looking for potential endemic fish species, we will find out further potential diving spots for Manta

Dives:

Day 5: Sawu

We will move further west to Sawu, for another day of pure exploration. Expect the unexpected would be a good way to approach the day. Hoping that we would be greeted with healthy coral reefs, good life variety and an exciting exploration experience.

Dives:

Day 6: Pulau Dana and Raijua

West of Sawu and surrounded by deep oceans, we hope to find bigger life around the reefs of these two small islands.

No. of 4  
Dives:

Day 7: Semau Island

The last dives are conducted close to Kupang, around the large island of Semau. Pure exploration with the focus on the possibility of spotting a good amount of criters.

No. of 2  
Dives:

Day 9: Departure

Guests will be escorted to the airport in Kupang and assisted with check in procedures, no doubt full of talk about the wonders of the most popular dive destination in the world.

DISCLAIMERS

The trip will be weather dependent and there might be long crossing required throughout. We will, try to adjust the best we can to the conditions and fulfil all itinerary briefed when you’re on the boat.

Due to the need to report to the local village, divers will need to be flexible with the start time of the first dive at some of the dive sites. We will ensure that you’re given timely update on this during the trip, however your understanding on last minute changes would be appreciate. This is because divers are only allowed in the water once permission is granted by the local villages and officers.

Damai are flexible to change itinerary suggested based on customer’s preference in the event that weather and time allow us to do so and if changes is agreeable by all participants on board
