The Raja Ampat itinerary combines the best dive sites of Dampier Strait, Fam, Mansuar and the awesome dive sites of Misool, the best diving area of Raja Ampat.

Some of the great highlights are the manta cleaning station near Mansuar and the huge schools of fish near Farondi.

The Dampier straight separates the Birds head Peninsula from Waigeo and Mansuar.

The name comes from the Dutch colonial times. It refers to the shape of the peninsula on the map, but it is also a paradise for many rare bird species.

Here the Pacific Ocean meets the Halmahera Sea, with an explosion of marine life as consequence.

With regular strong currents, big fish feel especially comfortable. Manta rays, reef sharks, different schools of mackerel, tuna and barracuda, dolphin and whales.

The night dives under the Arborek or Cape Mansuar jetty is a favorite spot with peculiar creatures such as wobbegongs, epaulette sharks (walking sharks), nudibranchs, pipefish, seahorses, frogfish, scorpion fish and the list goes on.

Misool is the southeast of the four big islands of the Raja Ampat archipelago. At the same time it is one of the most biodiverse regions in the world.

The rich variety of reefs are also not to be overlooked with vertical walls, slopes, dry rocks, caves and lagoons; some covered with hard corals while the others are covered with brightly colored soft corals.

Also renowned as the center of pygmy seahorses and gorgonians, everywhere you go you will be amazed by the profusion of marine life that Raja Ampat has to offer you

The menu onboard is varied and plentiful, with a variety of Indonesian feasts and local cuisine.

If you have any special dietary requirements, please be sure these are noted when completing the GIS (Guest information sheet).

You will awaken to fresh fruits, hot entrees, cereals and juices. Lunches feature delicious local cuisine.

Dinners are served each evening and include salads, vegetables, seafood, beef or chicken with a fresh homemade dessert.

Once onboard, please speak to the chef about any special needs.

Certain special dietary and beverage requests may not be available due to the remote nature of this location.

The Aggressor's beverage selection includes fruit juices, soft drinks, iced water, iced tea, coffee, and a limited selection of local beer and wine, which are complimentary.

Due to the high duty charged on liquor, we suggest you bring your own special brand.

Drinking and diving do not mix.

Once you consume alcohol, you become a sunbather until the next day.

The water temperature averages 82-86°F / 28-30°C

A 3mm wetsuit recommended

All dives are made from 2 dive tenders

### What the Guests Say

- Amazing. Honestly more than what I expected it to be. The staff was so kind and caring. I had a special bday and an unforgettable diving destination trip. The place is remote, quiet, beautiful, full of nature and life.

#### Adriana K

- Great accommodations, food and diving! Staff was quick to respond to any issues mid trip with rooms, AC, etc. Food was very tasty and plentiful. I like the mix of local food with western options. Diving was phenomenal! Granted conditions were amazing, yet, divemasters always checked the currents and conditions pre dive to ensure we were well informed.

#### Bryan S.

- Everything was really excellent. The diving was great & the weather held for us. The dive masters had amazing eyes for finding tiny creatures (e.g. pygmy seahorses, etc). Absolutely everyone was friendly, helpful, etc. Cruise director Jan was great, not only as a dive professional but just as an interesting person with lots of unique experiences, to talk to.
